As a Navision/Business Central Developer with a passion for the emerging trends of technology, particularly in cloud computing and development, I am dedicated to shaping and scaling this function. My expertise lies in leveraging cloud technologies to optimize business processes and drive innovation. Additionally, I have a keen interest in Power BI, utilizing its capabilities for data visualization and analytics to provide actionable insights for informed decision-making. Continuously staying abreast of advancements in cloud computing, development, and Power BI enables me to drive value and efficiency in ERP systems while pushing the boundaries of technological possibilities.
